CONGRESS**

2026

Water for Growth

IT IS IMPOSSIBLE TO THINK ABOUT THE FUTURE WITHOUT WATER

At ACADES, we drive climate change adaptation by ensuring water supply through non-traditional sources such as desalination and wastewater reuse. These solutions contribute to water security while reducing pressure on continental water sources..

TESTIMONIALS

BELÉN GUTIÉRREZ

Head of Desalination Department, Research and Development Direction GS Inima

“For me, the ACADES Congress 2024 was an enriching experience and a key meeting point to address Chile’s water challenges. In the context of an increasing drought, the event brought together top experts and professionals from different fields and companies to discuss challenges and opportunities in the sector, share success stories, and present innovative solutions”.

MIRIAM BRUSILOVSKY

President, Israel Desalination Society

“The ACADES Congress 2024 was a truly inspiring and enriching experience. I was impressed by the high level of organization, the excellent facilities, and the remarkable attendance. The presentations were of great thematic quality, featuring key industry figures from Chile and abroad, who provided innovative perspectives on business and governance”.

GONZALO DELACÁMARA

Academic Director & Adjunct Professor at IE University

“Being one of the international speakers at the ACADES Congress 2024 was a unique opportunity to discuss Chile’s long-term water security in the context of unavoidable climate change adaptation. After enduring severe megadroughts, the country must necessarily advance in diversifying water sources through the reuse of treated wastewater and desalination of seawater and brackish water”.

REGISTRATION FEES

Until
September 30, 2025

Members	USD 738
Supporting Partners	USD 898
Non-Members	USD 1,071

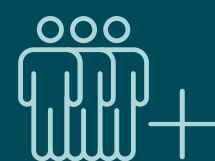

Until
December 31, 2025

Members	USD 916
